Sri Hari

Software Developer

+91 9940731536 | srihari8286@gmail.com | sri-hari-v | sri8282 | portfolio

Skills

Languages: Python, Java
Frameworks: Pyramid, React
Core: DSA, OOP, DBMS, OS
Tools: Git, Docker, pandas, numpy

Projects

Trust-Aware Federated Learning System
Python, TensorFlow, Federated Learning, Distributed Systems
- Built a secure distributed ML training system using **TensorFlow Federated**, implementing trust scoring and anomaly detection to flag malicious participants without sharing raw data.
- Trained and evaluated the system on **10+ decentralized datasets** under simulated Byzantine attack scenarios, achieving **90%+ attack detection accuracy**.

Accident Detection & Emergency Alert System (IoT)
Embedded C, Arduino, GPS, GSM
- Designed an IoT-based accident detection system using vibration sensors (**MPU-6050**) to detect sudden impacts with <200ms latency.
- Integrated GPS and GSM modules for automatic real-time location alerts, achieving zero false-negative triggers across **15+ simulated test scenarios**.

Smart Glove for Speech Impairment
Python, IoT, ESP32, ML, Flex Sensors
- Developed a wearable hand gesture-to-speech conversion system using flex sensors and **ESP32** microcontroller with AI-based gesture recognition.
- Trained a custom ML classification model on gesture datasets, achieving **92%+ recognition accuracy** across 20+ distinct hand signs.

Experience

Software Engineering Virtual Intern **03/2026 – 04/2026**
JPMorgan Chase (Forage) – Remote
- Engineered backend components of a financial transaction processing system using **Java 17 and Spring Boot**, handling high-throughput data flows in a simulated production environment.
- Implemented event-driven communication via **Apache Kafka** for real-time transaction streaming, and validated end-to-end message workflows using **JUnit 5 and Embedded Kafka**.

Networking Engineer Intern **06/2025 – 08/2025**
Cisco – Remote
- Configured and analyzed enterprise-grade routing, switching, and network troubleshooting in simulated and real-world scenarios using Cisco tools.
- Implemented basic security configurations across enterprise network architecture, reducing exposure surface in lab environments.

Cyber Security Analyst Intern **06/2024 – 08/2024**
Cisco – Remote
- Conducted vulnerability assessments and threat analysis using industry-standard tools, identifying potential attack vectors across network security scenarios.
- Applied concepts of ethical hacking and enterprise security practices to simulate and mitigate common cybersecurity risks.

Achievements & Extra-Curricular

- **Awarded Regional Level Certificate in Volleyball**, representing P M SHRI Kendriya Vidyalaya AFS, Sulur at state-qualifying competitions.

Education

Karunya Institute of Technology and Sciences (Deemed University) **2023 – 2027**
B.Tech in Computer Science and Engineering,CGPA:7.1 *Coimbatore, TN*

P M SHRI Kendriya Vidyalaya AFS, Sulur **2011 – 2023**
Primary & Secondary Education,CGAP:8.0 *Coimbatore, TN*
